

There are very good reasons to support Continuing Lambda's Legacy:

- The Lambda Chapter is showing an example to the DePauw campus of a fraternity's contribution to society through its graduates. Our graduates live the creed.
- Lambda's undergraduates have brought the chapter to its best performing state in a generation.
 - It's the one opportunity in YOUR life—right now—to make Lambda's recent upward climb sustainable for a generation.

Please don't miss this one-time effort to achieve our goal together.

- Many of our brothers have already given substantially to get the campaign within reach of success. Your support is needed—along with your brothers—to close the final gap.
- A five-year payment period has been established to allow some donors more flexibility with their pledge. For example, a payment of \$125 paid quarterly would total \$2,500 over five years. This would make a tremendous difference.
 - With a broad base of support, we can culminate many years of effort to restore Lambda Chapter's position of leadership.
 - Your participation really is needed.

Please join your brothers. Put your name beside theirs on the honor roll of donors. Thank you. Your contribution will make a difference in the lives of our future leaders.

CONTINUING LAMBDA'S LEGACY

The Campaign for Phi Gamma Delta at DePauw

April 2015

Brothers in Lambda of Phi Gamma Delta:

This Continuing Lambda's Legacy Campaign is the capstone of a 10-year effort to preserve and renovate the chapter house of the oldest chapter of Phi Gamma Delta in continuous existence! It is appropriate—and it is necessary—that all of us come together to pass along a sustainable legacy for the next generations of Lambdas.

It is appropriate for each of us to help restore the Lambda chapter house:

- The benefits provided by previous generations, that we enjoyed while we were undergraduates
- To ensure that succeeding generations of Lambdas can carry on the ideals and values of Phi Gamma Delta
- Lambda's graduates are deserving of our support as they continue to excel academically and philanthropically, earning national awards in technical competitions and post graduate scholarships.

Your participation is necessary for us to reach our goal.

- Raising \$2.5 million from 900-plus graduates, even with the extraordinary generosity from lead donors, is a challenge. Please consider the supportive environment, learning experiences, leadership development opportunities, and deep lifelong friendships that Lambda has provided you over the years. And consider the importance of maintaining these opportunities for future generations.
- If you have not made your pledge, please do so now. Pledges can be made over five years.
- Challenge brothers from your pledge class or era to match your gift.
- We need to do this together. Don't be left out. When this renovation is completed, each Graduate Brother will want to share in the pride of being part of this effort. Will your name be listed on the honor roll recognizing all donors?

2015 is the 50th anniversary year of the completion of Lambda's chapter house.

- To remain competitive with the renovations of other Greek houses on campus, we must continue to make improvements to our facility.
- This once-in-a-generation effort was launched to preserve and renovate our chapter house and maintain the chapter's continued leadership role at DePauw.

2016 is the year for renovation of the house. Now is the time to fund it.

- New improvements have been made to the plans, which are here for you to see. We believe they are worth getting excited over, and well worth supporting!
- Construction is planned to commence this coming January 2016, to be complete in October 2016.

To those who have already pledged, thank you for your commitment to Lambda. To those who have not, please help us reach our goal by formalizing your pledge today. Let us now join together to Continue Lambda's Legacy.

Douglas D. Mitchell '70
Campaign Chair
Pergé!

New front street-level view: With a low brick wall and driveway sentinels, the full size of our property will be seen as a single entity.

Outstanding landscaping and a welcoming appearance from (1) College Ave. and (2) from the rear parking lot.

New Enhancements have been added since the Original Design

After “sharpening the pencil” and more detailed design work, these latest renderings show further improvements to the renovation project, which now include plans for a new high efficiency, forced air heating and air conditioning system throughout the house.

New Plans and New Features:

- Energy efficient, locally controlled heating and air conditioning throughout the house.
- A more spacious front entry to provide direct access to the multi-purpose dining area.
- New paved rear parking lots and front brick wall present a unified property appearance.
- Walkways have been added for access from the front door to the rear patio and from parking areas to the rear entry points.
- Decorative trees, plants, and seat walls improve the view south from the dining and patio areas.
- New study lounges bring light and more variety to the look of the second- and third-floor front hallways.

Please make your pledges now—to ensure that construction can complete next year!

Front foyer: A wider, spacious floor plan will provide direct sight lines and access to the enlarged multi-purpose dining area.

Even more space in the dining room via modifications to the plan.

Lortz Library: Note the ample light and the view of the south lawn, also a new plan to place Lambda’s archives here.

Front Hall Study Lounge: FIJI’s front hallways will gain outdoor light and a more spacious feel with the addition of study lounges on the second and third floors.
